

FP7-ENERGY-2013-1

Research and development of innovative solar thermal facades

FLUIDGLASS

Solar Thermal Glass Facades with Adjustable Transparency

Start date of Project: 01/09/2013

Duration: 48 months

Deliverable: D7.1

Dissemination strategy document prepared

Due date of deliverable: 30/12/2013

Actual submission date: 13/02/2014

Responsible WP: Václav Smítka, WP7, AMI

Revision: v2.0

Dissemination level		
PU	Public	X
PP	Restricted to other programme participants (including the Commission Services)	
RE	Restricted to a group specified by the consortium (including the Commission Services)	
CO	Confidential, only for members of the consortium (including the Commission Services)

Delivery date	13.02.2014

DISTRIBUTION LIST

Date	Issue	Recipients
14.02.2014	V2.0	GA+PSC+PO (through partners' area)

Executive Summary

Timely and effective dissemination of results is an essential part of every research project. This ensures that the gained knowledge or exploitable foreground can benefit the whole society, and that any duplication of research and development activities is avoided. Within the European Union's Seventh Framework Programme projects have to disseminate their public results and report on all of their dissemination activities at their reports.

A dissemination strategy document for the FLUIDGLASS project has been therefore developed in order to fulfil the above mentioned goals and ensure that all the possible dissemination routes for the obtained results are identified and used during the whole course of the project. This document will be updated in M18 and M30.

Nevertheless it is necessary to mention that the dissemination of the project's achievements should never jeopardize the potential protection of generated intellectual property (e.g. patent, product design) and further industrial application. Therefore, before any dissemination activity (publication, presentation) strict rules of prior notice to all partners will be applied, according to EC guidelines and in line with the FLUIDGLASS Consortium Agreement. Partners will have the possibility to refuse dissemination of their own know-how (background or foreground) when it could potentially harm the partner's interests.
